JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS
Volume 11, Numbers 1-6, 1970

(A translation of Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki)

Volume 11, Number 1 January-February, 1970

	Engl.	Russ.
Radiative Transfer Equation in Noninertial Coordinate Systems—Yu. I. Morozov	1	3
Average Absorption Coefficient for Optically Thin Media—S. P. Detkov	10	12
Shock Stability in Magnetogasdynamic Channel Flows—F. A. Slobodkina	14	16
Dynamic Stabilization of Thin Plasma Filaments—M. G. Nikulin	21	24
On the Expansion into a Vacuum of a Rarefied Plasma with Two Sorts of Ions —V. M. Gefter	28	32
Features of the Electric Current and Field Distributions in Flows with Narrow Layers of Highly Conductive Gas—E. K. Kholshchevnikova	35	39
An Approximate Method for Calculating the Boundary Layer of Two-Temperature Plasma at Electrodes with Large Values of the Hall Parameter—L. E. Kalikhman	41	44
Damping of Drift Waves—R. K. Mazitov	50	53
Reflection of Magnetoacoustic Waves—L. Ya. Kosachevskii	54	56
Effect of the Adiabatic Exponent on the Reflection of Shock Waves—G. M. Arutyunyan, V. A. Belokon', and L. V. Karchevskii	60	62
The Pseudoturbulent Diffusion of Particles in Homogeneous Suspensions —Yu. A. Buevich and V. G. Markov	65	67
Relaxation of a Liquid Layer under the Action of Capillary Forces—O. V. Voinov	71	73
Thermal and Diffusive Relaxation of an Evaporating Drop with Internal Heat Liberation —F. G. Volkov and A. M. Golovin	76	78
Model of the Motion and Shock Waves in Two-Phase Solids with Phase Transitions —R. I. Nigmatulin	86	88
Configuration of the Atomic Planes Bordering a Crack in the Modified Peierls-Nabarro Model—M. Kh. Blekherman and V. L. Indenbom	94	96
The Integral Representation of Fractionally Exponential Functions and Their Application to Dynamic Problems of Linear Visco-elasticity—S. I. Meshkov	100	103
On Measuring the Compressibility of Soils—A. M. Skobev	108	111
On Active Loading of a Bar Made of a Material with Delaying Yield in the Case of a Nonlinear Hardening Diagram—Yu. P. Gulyaev	112	113
Generalization of the Operating Characteristics of a Segmented Plasma Generator with Constricted Channel—V. A. Kosarenkov, E. I. Ryabtsev, G. P. Stel'makh, and N. A. Chesnokov	115	115
Investigation of the Fringe Currents Associated with the Motion of a Plasma along the Channel of a Discharge Tube Through a Nonuniform Magnetic Field —Yu. F. Kashkin	119	119
Experimental Investigation of Shock Waves in a Partially Ionized Discharge Plasma —Yu. I. Chutov	124	124
The Microarc Operating Regime of MHD Generator Electrodes—V. I. Zalkind, V. V. Kirillov, Yu. A. Larionov, and N. S. Semenov	131	130
BRIEF COMMUNICATIONS		
Effect on the Discharge Regime of Blowing Protective Gases into the Layer Close to the Porous Electrodes of an MHD Device—V. O. German, Yu. P. Kukota, and G. A. Lyubimov	136	135

Engl./Russ.

Effect of Gas Temperature on Breakdown Potential—G. N. Dandaron, G. Yu. Dautov, and G. M. Mustafin 140 138
Nonlinear Absorption of Laser Pulses by a Partially Ionized Gas—N. A. Generalov, G. I. Kozlov, and Yu. P. Raizer 144 142
Measurement of the Atomic Oxygen Particle Concentration in Dissociated Gases —S. Zh. Toktomyshev 149 146
Measurement of the Acoustic Admittance of the Burning Surface of Gunpowder —A. D. Margolin, I. B. Svetlichnyi, P. F. Pokhil, and A. S. Tsirul'nikov 152 149
On the Spinning-Detonation-like Properties of High Frequency Tangential Oscillations in Combustion Chambers of Liquid Fuel Rocket Engines—O. F. Ar'kov, B. V. Voitsekhovskii, V. V. Mitrofanov, and M. E. Topchiyan 159 155
Kinetics of Heat Release in the Condensed Phase of Pyroxylin at Elevated Temperatures —V. V. Aleksandrov and S. S. Khlevnoi 162 158
On the Stability of Steady Combustion of Solid Fuels—G. L. Komissarova and L. M. Sulima . 167 163
Amplification of Weak Shocks in a Burning Two-Phase Liquid-Gas System—A. A. Borisov, B. E. Gel'fand, S. A. Gubin, S. M. Kogarko, and A. L. Podgrebenkov 172 168
Excess Pressure in a Pulsed Liquid Jet—G. N. Chermenskii 179 174
Two-Dimensional Problem of the Deformation of a Plate by a Glancing Detonation Wave —A. A. Deribas and G. E. Kuz'min 182 177
Scattering of Light by a Turbulent Liquid—N. P. Verkhovykh, Yu. F. Verkhovykh, V. M. Sysak, and A. M. Trokhan 186 181
Use of the Cellular Model in Calculating the Viscosity of Disperse Systems—V. M. Safrai . 188 183
A Solution of the Problem of Plane-Parallel Pressure-Nonpressure Flow—A. Begmatov . . 192 186
Spectrum of Small Perturbations in Plane Concrete Flow—V. N. Shtern 196 189
Influence of End Impedances on the Natural Frequencies of an Acoustic Resonator —V. A. Gruzdev and V. I. Slabnyak 198 190

Volume 11, Number 2 March-April, 1970

Plasma Density and Electric Field Strength Distributions at a Boundary with an Electrode—I. P. Stakhanov and P. P. Shcherbinin 201 4
Diagnosis of a Hydrogen Plasma by Beams of Helium Atoms of Different Energy —N. I. Alinovskii 204 7
Asymmetric Model of a Viscous Electromagnetic Fluid—V. M. Suyazov 209 12
Parametric Excitation of Corkscrew Instability of a θ-Pinch by a High-Frequency Longitudinal Current—M. G. Nikulin 216 21
Shock Heating of Plasma in a Rapidly Increasing Magnetic Field—V. A. Kapitonov, V. A. Kornilov, V. M. Lagunov, Yu. E. Nesterikhin, A. N. Papyrin, and A. G. Ponomarenko 222 28
The Overheat Instability in an Optically Dense Plasma Discharge—S. A. Triger 230 39
The Distribution of Electric Potential in a Channel with Continuous Electrodes for Large Magnetic Reynolds' Numbers—A. E. Konovalov 233 42
One Form of Current Instability for a Plasma of Finite Conductivity—I. K. Konkashbaev 238 47
The Rayleigh Problem for a Non-Newtonian Electrically Conducting Fluid —Ya. G. Sapunkov 241 50
Locality Properties of the Problem of Hydrodynamic Stability—M. A. Gol'dshtik, V. A. Sapozhnikov, and V. N. Shtern 246 56
Semiempirical Theory of Turbulent Transfer—A. T. Onufriev 252 62
The Nature of the Electrical Impulse in an Explosion—M. E. Gertsenshtein and E. I. Sirotinin 260 72
On the Onset of Detonation in a Nonuniformly Heated Gas—Ya. B. Zel'dovich, V. B. Librovich, G. M. Makhviladze, and G. I. Sivashinskii 264 76

Effect of Initial Temperature on the Thickness of the Unburnt Layer of Powder on a Metal Plate—O. I. Nefedova, S. S. Novikov, P. F. Pokhil, and Yu. S. Ryazantsev 271 85
Combustion in Narrow Cavities—G. P. Cherepanov 276 90
Elasticity-Theoretic Plane Problem for an Anisotropic Body Subject to an Electrical Effect—I. A. Vekovishcheva 282 96
Damped Vibrations of Hereditary-Elastic Systems with Weakly Singular Kernels—V. M. Zelenev, S. I. Meshkov, and Yu. A. Rossikhin 290 104
Creep of Polymer Materials in Structural Elements—N. I. Malinin 294 109
The Use of Photoelastic Coatings in Investigations of Early Stages of Fatigue Failure—A. Ya. Aleksandrov, L. A. Krasnov, and V. A. Kushnerov. 310 126
Experimental Investigation of the Yield Condition in Relation to Dynamic Loading of Compressible Soils—A. V. Mikhalyuk and G. I. Chernyi 315 131
Dynamic Compressibility of Porous NaCl at Low Pressures—L. V. Belinskii and B. D. Khristoforov. 318 134
Infiltration on a Strip in the Presence of an Inclined Impermeable Horizon—I. I. Kulabukhova. 324 139
Diffusive Flow to a Sphere at Small and Moderate Reynolds Numbers. Approximation of a Diffusion Boundary Layer—V. M. Voloshchuk and L. V. Stuzhneva. 328 144
Cumulative Streams during the Impact Collapse of Cavities in Thin Liquid Layers—V. K. Bobolev and A. V. Dubovik 332 148
Density Stratification in a Liquid during Temperature Changes—A. I. Saet and V. A. Tatarchenko. 336 152
Electrical Conductivity of an Argon Plasma in a Stabilized Arc—V. A. Baturin 338 153
Interaction of a Monoenergetic Beam of Gas Atoms with a Three-Dimensional Crystal—A. A. Pyarnpuu 347 162
Gas Content of a Foam Bed at Reduced Pressures—A. N. Khoze and Yu. I. Sharov 352 166
Experimental Investigation of Free Convection above a Heated Horizontal Wire—Yu. N. Lyakhov. 355 169
Specific Heat of Liquids at Constant Pressure Investigated by the Method of Continuous Heating in the Quasiregular Regime—V. A. Lavrov and E. P. Sheludyakov 360 174

Volume 11, Number 3 May-June, 1970

Nonlinear Stage of Hose Instability—Yu. A. Berezin 365 3
Nonlinear Transformation of Langmuir Wave Beam in Isothermal Plasma—V. A. Gudkova and V. A. Liperovskii 371 11
Effect of Flow Velocity on Current Distribution in MGD Channel—A. G. Korsun and A. L. Levin 379 20
Creation of Nonequilibrium States and Change of Plasma Absorptivity under the Action of Powerful Light Pulses—N. A. Generalov, G. I. Kozlov, and Yu. P. Raizer 384 27
Thomson Scattering of Ruby Laser Light by Plasma behind Collisionless Shock Wave Front—A. N. Babenko, É. P. Kruglyakov, R. Kh. Kurtmullaev, and A. N. Papyrin. . . 393 38
Effect of Inelastic Electron—Atom Collisions on Nonequilibrium Ionization Rate—I. P. Stakhanov and V. E. Cherkovets 396 42
Production of Strong Toroidal Fields by Magnetic Flux Compression—S. G. Alikhanov and V. G. Belan 400 47
Numerical Calculation of the Magnetic Cumulation Process—A. V. Kashirskii and V. A. Odintsov 404 51
Some Problems of Polarization Sensor Theory—Yu. V. Lisitsyn, V. N. Mineev, and E. Z. Novitskii 409 56

Relative Effect of Temperature Factor on Turbulent Gas Boundary Layer at Finite Reynolds Numbers—S. S. Kutateladze and B. P. Mironov	414	61
Laminar Boundary Layer with Uniform Suction on Flat Plate in Oscillating Flow —I. V. Pushkareva	418	66
Mixing of High-Temperature Jets of Nonuniform Gases—A. L. Mossé	423	71
Motion of Ellipsoidal Bubble in Low-Viscosity Liquid—O. V. Voinov, A. M. Golovin, and A. G. Petrov	427	76
Unsteady Motion of Rotating Ring of Viscous Incompressible Liquid with Free Boundary —V. O. Bytev	432	82
Calculation of Explosive Action in Brittle Rock. Case of Fracture with Formation of Tearing Cracks—A. B. Bagdasaryan	439	89
Diagrams of Critical Equilibrium for Brittle Bodies with Sharp Flaws—L. L. Libatskii and V. V. Panasyuk	447	98
Failure of Solids under Strain—D. A. Kiyalbaev and A. I. Chudnovskii	453	105
Stationary Mode of a Nonlinear Elastically Hereditary Oscillator—S. I. Meshkov	458	111
Shear Crack Propagation in the Residual Stress Field—V. V. Dudukalenko and N. B. Romalis	463	117
More on the Mechanism of Polymer Disintegration under the Action of a Radiating Plasma Jet—M. A. Sultanov	466	120
Pressure at Shock Wave Front Near Laser Spark Breakdown in Water—A. A. Buzukov and V. S. Teslenko	469	123
Shock Wave Associated with Optical Breakdown in Water—A. I. Ioffe, N. A. Mel'nikov K. A. Naugol'nykh, and V. A. Upadyshev	471	125
Stability of Plane-Parallel MHD Flows in Transverse Magnetic Field—A. M. Sagalakov and V. N. Shtern	474	127
Passive Corpuscular Diagnostics of a High-Temperature Plasma—N. I. Alinovskii, A. T. Altyntsev, and N. A. Koshilev	479	132
Electrical Current and Potential Distribution in Flat Channel with Point Electrodes —A. E. Konovalov	485	137
Refraction of Oblique Shock Wave Front at Boundary with Less Rigid Medium —A. N. Dremin and G. I. Kanel'	488	140
Extinction of Opposed-Jet Diffusion Flame—G. I. Sivashinskii	493	145
Effect of Initial Liquid Parameters on Jet Disintegration—V. Yu. Nezgada	496	147
Stability of Laminar Liquid Flow in Rectangular Pipes—R. S. Kuznetskii	500	150
Application of a Shadow Instrument for Determining Turbulence Characteristics —V. N. Stasenko	503	152
Energy Dissipation in Unsteady Incompressible Fluid Flows—V. S. Sizonov	507	155
Convective Wall Plume—V. D. Zimin and Yu. N. Lyakhov	511	159
Determining Reservoir Pressure in Closed Reservoir and Elastic Expulsion of Fluid when Reservoir Is Opened—Yu. A. Afinogenov and V. I. Pen'kovskii	514	162
On the Green-Naghdi Theory of Mixtures—R. I. Nigmatulin	521	168

Volume 11, Number 4 July-August, 1970

Electric Field Excited in Air by a Pulse of Gamma Rays — Yu. A. Medvedev, B. M. Stepanov, and G. V. Fedorovich	523	3
Theory of Plane Flows of a Readily Conducting Plasma in a Pipe — A. I. Morosov and A. P. Shubin	528	9
Stationary Supersonic Conducting Gas Flow in a Channel with Nonconducting Walls under Weak Magnetohydrodynamic Interaction — E. K. Kholshchevnikova	538	20
Certain Magnetohydrodynamic Flows Associated with the Propagation of Waves —Yu. Ya. Boguslavskii, A. I. Ioffe, and Yu. G. Statnikov	547	30

	Eng.	Russ.
Nonstationary Conducting Free Flow in a Transverse Magnetic Field – A. I. Bertinov and D. A. But	551	34
Motion of a Magnetizable Liquid in a Rotating Magnetic Field – V. M. Suyazov	557	40
A Kinetic Theory of Gas Mixtures with Regard to the Laws of the Thermodynamics of Irreversible Processes – A. D. Khon'kin	561	44
Diffusion and Thermal Slip of a Binary Gas Mixture – Yu. Yu. Abramov and G. G. Gladush	567	51
Boundary-Layer Development in the Initial Section of a Tube with Injection – A. I. Leont'ev, P. V. Nikitin, and A. V. Fafurin	571	56
Definition and Calculation of Effective Ambipolar Diffusion Coefficients for a Laminar Multicomponent Ionized Boundary Layer – O. N. Suslov and G. A. Tirskii	575	60
Equation for Nonsteady-State Comubstion Velocity of a Powder – B. V. Novozhilov	585	73
Theory of the Disintegration of a Heated Surface Layer, Allowing for Its Separation into Individual Phases – V. N. Kondrat'ev, I. V. Nemchinov, and V. M. Khazins.	591	79
Locally Uniform No-Collision Suspensions in Euler Approximation – Yu. A. Buevich, E. N. Ivshin, and V. G. Markov	602	91
Irregular Movement of Ground Waters with Evaporation – N. N. Kochina	611	102
Irregular Filtration in Stratified Grounds – M. A. Sattarov	615	106
Certain Effects of a Nonlocal Nature in a Chain Involving Long-Range Interaction in an Elastic Medium – A. M. Vaisman and A. P. Putintseva	621	113
Propagation of Cleavage Cracks in Single Crystals of Lithium Fluoride – A. M. Mikhailov	627	119
Creep of Initially Anisotropic Unhardened Materials – O. V. Sosnin	632	123
Electrical Discharge in Pentaerythritol Tetranitrate Powder – P. I. Zubkov and L. A. Luk'yanchikov	637	128
Investigation of the Electrode Potential Drop at a Molybdenum Electrode in a Flow of Argon Seeded with Potassium – V. O. German, G. A. Lyubimov, and B. V. Parfenov	641	132
Effect of Surface and Volume Ionization on the Electrode Potential Drop – G. V. Babkin and A. V. Potapov	646	137
Self-Consistent Bunches of Oscillating Heavy Particles in an Accelerator – A. D. Vlasov	649	140
On Stream Inhomogeneities in a Pulsed Electromagnetic Accelerator – A. M. Rushailo	653	143
Flow of a Viscous Gas in a Shock Layer with Equilibrium Chemical Reactions – I. M. Breev and Yu. P. Golovachev	661	150
Conditions for Different Steady States in an Adiabatic Continuous-Flow Reactor with a Catalyst Layer – É. A. Chernova	665	153
Detonation of Liquid Hydrazoic Acid and Its Aqueous Solutions – R. Kh. Kurbangalina, E. A. Patskov, L. N. Stesik, and G. S. Yakovleva	672	160
Shock Waves in a Shallow Reservoir – L. S. Kozachenko and B. D. Khristoforov	678	165
Onset of Cavitation during Flow around a Protuberance on a Wall in a Planar Channel – L. A. Galin, A. P. Frolov, and K. K. Shal'nev	685	172
Spatial and Temporal Development of Disturbances in a Plane Channel – A. P. Chudnenko	689	176
Vaporization of a Drop in an Acoustic Field – A. M. Boldarev, A. P. Burdukov, and V. E. Nakoryakov	691	178
Diffusion of Aerosols in the Surface Layer of the Atmosphere – K. P. Kutsenogii	694	180
Resistance of Fibrous Filters in a Slip Flow – Yu. M. Glushkov	700	186
Calculation of Residual Oil Saturation in an Inhomogeneous Bed in the Case of Mutual Displacement of Fluids with Viscoplastic Properties – G. V. Kudyavtsev and A. Kh. Fatkullin	704	189

Eng./Russ.

Volume 11, Number 5 September-October, 1970

Consumption of Electrode Material in Cathode Region of an Arc – G. A. Lyubimov. . . .	709	3
Structure of a Shock Wave in Which Multiple Ionization of the Atoms is Taking Place – N. N. Magretova, N. T. Pashchenko, and Yu. P. Raizer	716	11
Propagation of Electromagnetic Disturbances above a Plane Surface – V. V. Ivanov and G. P. Chernyi	726	22
On Rayleigh–Taylor Instability in Magnetohydrodynamics in the Galvanic Approximation – É. P. Zimin and O. A. Éismont	734	31
Deformation of Drops in the Reaction Zone of Heterogeneous Detonation – A. A. Borisov, B. E. Gel'fand, S. A. Gubin, S. M. Kogarko, and A. L. Podgrebenkov.	741	39
Instability of Monochromatic Waves on the Surface of a Liquid of Arbitrary Depth – V. E. Zakharov and V. G. Kharitonov.	747	45
Approximate Calculation of the Added Mass in Flow Around a Multirow Array of Rods – V. I. Fedenko.	752	50
Motion of the Surface Separating Two Liquids of Finite Depth under the Influence of Variable Force Fields – V. S. Sizonov	756	55
The Quasistationary One-Dimensional Motion of Aerated Oil and Gas – Yu. A. Afinogenov	763	63
Turbulent Wake in a Stratified Medium – A. T. Onufriev	768	68
Propagation of Weak Perturbations in Two-Phase Media with Phase Transitions – A. I. Ivandaev and R. I. Nigmatulin	773	73
Speed of Sound in Two-Phase Vapor-Liquid Systems – I. S. Radovskii	778	78
On Equilibrium Stability of an Elastic–Viscoplastic Medium – A. N. Sporykhin.	785	86
The Established Motion of a Viscoplastic Medium between Two Coaxial Cones and in a Sector Bounded by Two Sides – A. D. Chernyshov.	791	93
Some Models of Micropolar Viscoelastic Media – A. T. Listrov and Yu. A. Shurinov . .	797	100
Calculation of the Blast Effect in Brittle Rock (Fracturing by Crushing, Formation of Cleavage Cracks, and Separation) – A. B. Bagdasaryan	801	104
Failure by Torsion of a Round Rod with a Crack Following Arc of Circle – N. B. Romalis	815	121
Limiting Equilibrium of a Plate Weakened by Two Cracks – N. V. Pal'tsun.	820	125
Analysis of Experimental Data on Fatigue Crack Development – Kh. Khalmanov and G. P. Cherepanov	824	129
Periods of the Fatigue Failure Process – L. A. Gorbachev, T. A. Lebedev, and T. K. Marinets.	828	133
Creep in Materials with Different Tension and Compression Behavior – O. V. Sosnin. .	832	136
Calculation of the Integrated Heat-Transfer Coefficients for Free Convection in Closed Axially Symmetric Vessels – Yu. A. Kirichenko, A. A. Motornaya, and P. S. Chernyakov	836	140
Frequency at Which Vapor Bubbles Form during Boiling – V. F. Prisnyakov	840	143
Operation of a Fluid Jet Amplifier in the Cavitation Regime – B. A. Chernyavskii and K. K. Shal'nev	844	147
The Energy Balance in Turbulent Motion in a Plane Curvilinear Channel – D. A. Nusupbekova and B. P. Ustimenko.	848	150
Turbulent Flow Structure at $F > 1$ – N. T. Fazullin	852	154
Application of a Shadowgraph Method to Visualize the Velocity Profile in Fluid Flow – S. D. Solomonov and G. G. Spirin	854	156
Structure of a Supersonic Jet of an Argon-Helium Mixture in a Vacuum – A. A. Bochkarev, V. A. Kosinov, V. G. Prikhod'ko, and A. K. Rebrov.	857	158
Explosive-Type High-Temperature Radiator for Photometry – E. G. Popov and M. A. Tsikulin	862	164

Engl./Russ.

Certain Characteristics of Fluctuations in Arc Current and Voltage and in the Brightness of the Jet in Eddy-Type Plasmotrons – A. S. An'shakov, G. Yu. Daumov, and A. N. Timoshevskii 867 168
Partial Shunting of an Arc Column by Stabilizing Diaphragms – V. A. Baturin 871 171
Determination of Critical Adiabaticity Parameters for Different Magnetic Field Geometries – A. N. Dubinina and L. S. Krasitskaya 877 176
Precipitation of a Unipolar-Charged Aerosol on an Array of Grounded Conductors – V. F. Dunskii and K. A. Krishtof 880 179

LETTERS TO THE EDITOR
Remark on V. K. Bodulinskii's and Yu. A. Medvedev's Letter "Electromagnetic Disturbances Caused by an Expanding Ideally Conducting Sphere in a Magnetic Field" 886 184

Volume 11, Number 6 November-December, 1970

M. A. Lavrent'ev (On the Occasion of His 70th Birthday) 887 3
Conservation Laws and Invariants of Differential Equations in Some Problems Relating to a Nonhomogeneous Medium – N. S. Erokhin 893 9
Nonlinear Interactions of Ion-Sound Waves and Helicons in a Plasma – A. S. Kingsep 901 18
Plasma Flow Accompanied by Blowing and Pumping of Plasma across Electrodes – A. P. Shubin 908 26
Electrohydrodynamic Flow in a Two-Dimensional Channel with an Axially Disposed Electrode-Emitter – V. I. Grabovskii 916 35
Theory of the Temperature Relaxation of an Electron-Ion Plasma in a High-Frequency Electric and Constant Magnetic Field – V. P. Silin and V. T. Tikhonchuk 922 41
Two-Dimensional Steady Currents in a Nonlinear Conducting Medium – I. M. Rutkevich 929 49
The Joint Laminar Convection of a Binary Mixture near a Vertical Surface – P. M. Brdlik and V. I. Dubovik 934 54
Spectral Theory of Concentration of Disperse Systems – Yu. A. Buevich 939 60
Axisymmetric Macrodispersion Problems in Stratified Porous Media – A. A. Roshal' 950 72
Periodic Dislocation Motion in a Relaxing Medium – V. I. Belyavskii and B. M. Darinskii 957 79
Correlation Functions of Internal Stresses of Dislocation Loops – V. G. Baryshnikov and T. D. Shermergor 963 86
Application of Nonlinear Hereditary Strain Theory to Description of Stress Relaxation in Metals, and Conversion of Relaxation Data to Creep – G. S. Vorotnikov and L. Kh. Papernik 971 94
Collapse of a Cylindrical Cavity in a Fluid Layer under Impact – É. I. Andriankin, V. K. Bobolev, and A. V. Dubovik 975 98
Effect of the Pressure of Shock Compression on the Critical Shear Stresses in Metals – S. A. Novikov and L. M. Sinitsyna 983 107
Effect of High Pressure on Pore Formation – B. V. Voitsekhovskii and B. I. Mikhailov 987 110
Compression of Magnetic Field in an Imploding Spherical Cavity – V. K. Bodulinskii and Yu. A. Medvedev 991 114
Effect of Nonconducting Side Walls on Induced End Electric Currents – Yu. F. Kashkin 994 116
Viscosity of Rubidium near Its Solidification Temperature – V. N. Genrikh and A. B. Kaplun 1001 122
Ionization Relaxation behind Shock Waves in Nitrogen at Speeds of 17 to 25 km/sec – M. B. Zheleznyak 1007 126
Measurement of Gas Concentration on Wall in Case of Local Injection of Argon and Helium in Initial Section of Tube – É. P. Volchkov and E. I. Sinaiko 1012 131
